Volume 32 (1999)

Volume 32 Number 1 **January 1999**

V. J. Napadow, Q. Chen, V. J. Wedeen and R. J. Gilbert — 1 — **Intramural mechanics of the human tongue in association with physiological deformations**

J. Cholewicki, K. Juluru and S. M. McGill — 13 — **Intra-abdominal pressure mechanism for stabilizing the lumbar spine**

E. Kellis and V. Baltzopoulos — 19 — **The effects of the antagonist muscle force on intersegmental loading during isokinetic efforts of the knee extensors**

P. S. Walker and S. Sathasivam — 27 — **The design of guide surfaces for fixed-bearing and mobile-bearing knee replacements**

S. C. N. Chan and B. B. Seedhom — 35 — **'Equivalent geometry' of the knee and the prediction of tensions along the cruciates: an experimental study**

R. K. Dash, G. Jayaraman and K. N. Mehta — 49 — **Flow in a catheterized curved artery with stenosis**

M. Bottlang, J. L. Marsh and T. D. Brown — 63 — **Articulated external fixation of the ankle: minimizing motion resistance by accurate axis alignment**

R. T. Jaspers, R. Brunner, J. J. M. Pel and P. A. Huijing — 71 — **Acute effects of intramuscular aponeurotomy on rat gastrocnemius medialis: Force transmission, muscle force and sarcomere length**

Technical Notes

D. Friedrich, N. Rosarius, G. Rau and P. Diedrich — 81 — **Measuring system for in vivo recording of force systems in orthodontic treatment — concept and analysis of accuracy**

T. Spägele, A. Kistner and A. Gollhofer — 87 — **A multi-phase optimal control technique for the simulation of a human vertical jump**

T. Goto, N. Sasaki and K. Hikichi — 93 — **Early stage-stress relaxation in compact bone**

A. Leardini, A. Cappozzo, F. Catani, S. Toksvig-Larsen, A. Petitto, V. Sforza, G. Cassanelli and S. Giannini — 99 — **Validation of a functional method for the estimation of hip joint centre location**

L. V. Griffin, J. C. Gibeling, R. B. Martin, V. A. Gibson and S. M. Stover — 105 — **The effects of testing methods on the flexural fatigue life of human cortical bone**

I **Announcements**

0021-9290/00/$-see front matter © 2000 Published by Elsevier Science Ltd. All rights reserved.

Volume 32 Number 2 **February 1999**

A. Leardini, J. J. O'Connor, F. Catani and S. Giannini — 111 **Kinematics of the human ankle complex in passive flexion; a single degree of freedom system**

W. R. Jones, H. P. Ting-Beall, G. M. Lee, S. S. Kelley, R. M. Hochmuth and F. Guilak — 119 **Alterations in the Young's modulus and volumetric properties of chondrocytes isolated from normal and osteoarthritic human cartilage**

T.-W. Lu and J. J. O'Connor — 129 **Bone position estimation from skin marker co-ordinates using global optimisation with joint constraints**

P. Manfredini, G. Cocchetti, G. Maier, A. Redaelli and F. M. Montevecchi — 135 **Poroelastic finite element analysis of a bone specimen under cyclic loading**

J. H. Koolstra and T. M. G. J. van Eijden — 145 **Three-dimensional dynamical capabilities of the human masticatory muscles**

E. Tanck, W. D. van Driel, J. W. Hagen, E. H. Burger, L. Blankevoort and R. Huiskes — 153 **Why does intermittent hydrostatic pressure enhance the mineralization process in fetal cartilage?**

E. Trinkaus — 163 **Neandertal knees and ankles: a comment on Miller and Gross**

B. Van Rietbergen, R. Müller, D. Ulrich, P. Rüegsegger and R. Huiskes — 165 **Tissue stresses and strain in trabeculae of a canine proximal femur can be quantified from computer reconstructions**

R. L. Lieber, M. J. Silva, D. Amiel and R. H. Gelberman — 175 **Wrist and digital joint motion produce unique flexor tendon force and excursion in the canine forelimb**

Technical Notes

H. Liao and S. M. Belkoff — 183 **A failure model for ligaments**

A. J. Rapoff, D. M. Heisey and R. Vanderby Jr. — 189 **A probabilistic rule of mixtures for elastic moduli**

J. H. van Dieën and M. P. de Looze — 195 **Sensitivity of single-equivalent trunk extensor muscle models to anatomical and functional assumptions**

B. O. Ljung, J. Fridén and R. L. Lieber — 199 **Sarcomere length varies with wrist ulnar deviation but not forearm pronation in the extensor carpi radialis brevis muscle**

G. W. Hall, J. R. Crandall, D. V. Carmines and J. E. Hale — 203 **Rate-independent characteristics of an arthroscopically implantable force probe in the human achilles tendon**

Letter to the Editors

P. Zioupos — 209 **On microcracks, microcraking, in-vivo, in-vitro, in-situ and other issues**

Response Letter

D. B. Burr, C. Turner, M. R. Forwood and R. Pidaparti — 213 **Quantification of bone damage and crack morphology and its effect on skeletal fragility: response to Zioupos**

Volume 32 Number 3 **March 1999**

Survey Article

S. C. Cowin 217 **Bone poroelasticity**

S. Sathasivam and P. S. Walker 239 **The conflicting requirements of laxity and conformity to total knee replacement**

R. Zannoli, P. Schiereck, F. Celletti, A. Branzi and B. Magnani 249 **Effects of wave reflection timing on left ventricular mechanics**

L. E. Claes and C. A. Heigele 255 **Magnitudes of local stress and strain along bony surfaces predict the course and type of fracture healing**

C. T. Farley and D. C. Morgenroth 267 **Leg stiffness primarily depends on ankle stiffness during human hopping**

G. Luo, A. M. Sadegh, H. Alexander, W. Jaffe, D. Scott and S. C. Cowin 275 **The effect of surface roughness on the stress adaptation of trabecular architecture around a cylindrical implant**

N. Sasaki, N. Shukunami, N. Matsushima and Y. Izumi 285 **Time-resolved X-ray diffraction from tendon collagen during creep using synchrotron radiation**

D. L. A. Camacho, R. W. Nightingale and B. S. Myers 293 **Surface friction in near-vertex head and neck impact increases risk of injury**

K. J. Jepsen, D. T. Davy and D. J. Krzypow 303 **The role of the lamellar interface during torsional yielding of human cortical bone**

Technical Notes

I. A. F. Stokes and M. Gardner-Morse 311 **Quantitative anatomy of the lumbar musculature**

A. R. Ismail and S. S. Asfour 317 **Discrete wavelet transform: a tool in smoothing kinematic data**

M. Ding, A. Odgaard and I. Hvid 323 **Accuracy of cancellous bone volume fraction measured by micro-CT scanning**

327 **Announcements**

I **Index to Volume 31 (1998)**

Volume 32 Number 4 **April 1999**

ISB Keynote Papers — 1997

P. A. Huijing 329 **Muscle as a collagen fiber reinforced composite: a review of force transmission in muscle and whole limb**

R. B. Stein, K. Momose and J. Bobet 347 **Biomechanics of human quadriceps muscles during electrical stimulation**

E. Morag and P. R. Cavanagh 359 **Structural and functional predictors of regional peak pressures under the foot during walking**

R. J. Monti, R. R. Roy, J. A. Hodgson and V. R. Edgerton 371 **Transmission of forces with mammalian skeletal muscles**

J. P. Paul 381 **Strength requirements for internal and external prostheses**

G. Li, T. W. Rudy, M. Sakane, A. Kanamori, C. B. Ma and S. L. -Y. Woo 395 **The importance of quadriceps and hamstring muscle loading on knee kinematics and in-situ forces in the ACL**

D. A. Narmoneva, J. Y. Wang and L. A. Setton 401 **Nonuniform swelling-induced residual strains in articular cartilage**

R. R. Neptune and M. L. Hull 409 **A theoretical analysis of preferred pedaling rate selection in endurance cycling**

M. Farshad, M. Barbezat, P. Flüeler, F. Schmidlin, P. Graber and P. Niederer 417 **Material characterization of the pig kidney in relation with the biomechanical analysis of renal trauma**

Technical Notes

S. M. Tanaka 427 **A new mechanical stimulator for cultured bone cells using piezoelectric actuator**

G. Ferrigno, G. Baroni and A. Pedotti 431 **Methodological and technological implications of quantitative human movement analysis in long term space flights**

C. H. Turner, J. Rho, Y. Takano, T. Y. Tsui and G. M. Pharr 437 **The elastic properties of trabecular and cortical bone tissues are similar: results from two microscopic measurement techniques**

Erratum 443

Volume 32 Number 5 **May 1999**

X. Wang 453 **A behavior-based inverse kinematics algorithm to predict arm prehension postures for computer-aided ergonomic evaluation**

A. J. Ward-Smith 461 **The bioenergetics of optimal performances in middle-distance and long-distance track running**

B. A. O. McCormack and P. J. Prendergast 467 **Microdamage accumulation in the cement layer of hip replacements under flexural loading**

J. Hazel, M. Stone, M. S. Grace and V. V. Tsukruk 477 **Nanoscale design of snake skin for reptation locomotions via friction anisotropy**

A. D. Speirs, M. A. Hotz, T. R. Oxland, R. Häusler and L.-P. Nolte 485 **Biomechanical properties of sterilized human auditory ossicles**

S. L. Delp, W. E. Hess, D. S. Hungerford and L. C. Jones 493 **Variation of rotation moment arms with hip flexion**

N. K. Simha, M. Fedewa, P. H. Leo, J. L. Lewis and T. Oegema 503 **A composites theory predicts the dependence of stiffness of cartilage culture tissues on collagen volume fraction**

P. Schuller-Götzburg, Ch. Krenkel, T. J. Reiter and H. Plenk Jr. 511 **2D-finite element analyses and histomorphology of lag screws with and without a biconcave washer**

T. Spägele, A. Kistner and A. Gollhofer 521 **Modelling, simulation and optimisation of a human vertical jump**

Technical Notes

K. Miller 531 **Constitutive model of brain tissue suitable for finite element analysis of surgical procedures**

R. Riener and T. Edrich 539 **Identification of passive elastic joint moments in the lower extremities**

S. W. Hill, A. E. Patla, M. G. Ishac, A. L. Adkin, T. J. Supan and D. G. Barth 545 **Altered kinetic strategy for the control of swing limb elevation over obstacles in unilateral below-knee amputee gait**

H. R. Chaudhry 551 **Letter to the Editor**

A. Rachev 553 **Author's response**

Volume 32 Number 6 **June 1999**

A. Desplantez, C. Cornu and F. Goubel 555 **Viscous properties of human muscle during contraction**

J. Z. Wu, W. Herzog and M. Epstein 563 **Modelling of location- and time-dependent deformation of chondrocytes during cartilage loading**

G. Aschero, P. Gizdulich and F. Mango 573 **Statistical characterization of piezoelectric coefficient d_{23} in cow bone**

He Dongqi and Ren Zeqin 579 **A biomathematical model for pressure-dependent lamina cribrosa behavior**

A. Leardini, J. J. O'Connor, F. Catani and S. Giannini 585 **A geometric model of the human ankle joint**

A. D. Shah and J. D. Humphrey 593 **Finite strain elastodynamics of intracranial saccular aneurysms**

F. J. H. Gijsen, F. N. van de Vosse and J. D. Janssen 601 **The influence of the non-Newtonian properties of blood on the flow in large arteries: steady flow in a carotid bifurcation model**

Technical Notes

M. Rabuffetti and G. Baroni 609 **Validation protocol of models for centre of mass estimation**

R. Schmidt, C. Disselhorst-Klug, J. Silny and G. Rau 615 **A marker-based measurement procedure for unconstrained wrist and elbow motions**

P. R. Cavanagh 623 **Plantar soft tissue thickness during ground contact in walking**

C. G. M. Meskers, H. Fraterman, F. C. T. van der Helm, H. M. Vermeulen and P. M. Rozing 629 **Calibration of the "Flock of Birds" electromagnetic tracking device and its application in shoulder motion studies**

Letters to the Editors

A. Plamondon, M. Gagnon and D. Gravel 635 **Comments on 'Asymmetric low back loading in asymmetric lifting movements is not prevented by pelvic twist'**

I. Kingma, J. H. van Dieën, M. P. de Looze, H. M. Toussaint, P. Dolan and C. T. M. Baten 637 **Authors' response**

I **Announcements**

Volume 32 Number 7 **July 1999**

S. Gaupp, Y. Wang, T. V. How and P. J. Fish 639 **Characterisation of vortex shedding in vascular anstomosis models using pulsed doppler ultrasound**

D. Liu, S. Weiner and H. D. Wagner 647 **Anisotropic mechanical properties of lamellar bone using miniature cantilever bending specimens**

M. P. de Looze, H. Groen, H. Horemans, I. Kingma and J. H. van Dieën 655 **Abdominal muscles contribute in a minor way to peak spinal compression in lifting**

L. Wang, S. P. Fritton, S. C. Cowin and S. Weinbaum 663 **Fluid pressure relaxation depends upon osteonal microstructure: modeling an oscillatory bending experiment**

J. Kabel, B. van Rietbergen, M. Dalstra, A. Odgaard and R. Huiskes 673 **The role of an effective isotropic tissue modulus in the elastic properties of cancellous bone**

J. H. van Dieën and I. Kingma 681 **Total trunk muscle force and spinal compression are lower in asymmetric moments as compared to pure extension moments**

R. Raikova 689 **About weight factors in the non-linear objective functions used for solving indeterminate problems in biomechanics**

J. Kerner, R. Huiskes, G. H. van Lenthe, H. Weinans, B. van Rietbergen, C. A. Engh and A. A. Amis 695 **Correlation between pre-operative periprosthetic bone density and post-operative bone loss in THA can be explained by strain-adaptive remodelling**

F. J. H. Gijsen, E. Allanic, F. N. van de Vosse and J. D. Janssen 705 **The influence of the non-Newtonian properties of blood on the flow in large arteries: unsteady flow in a 90° curved tube**

Technical Notes

L. J. van Ruijven, M. Beek and T. M. G. J. van Eijden 715 **Fitting parametrized polynomials with scattered surface data**

N. K. Fowler and A. C. Nicol 721 **A force transducer to measure individual finger loads during activities of daily living**

J. Calisse, A. Rohlmann and G. Bergmann 727 **Estimation of trunk muscle forces using the finite element method and in vivo loads measured by telemeterized internal spinal fixation devices**

J. J. Faraway, X. Zhang and D. B. Chaffin 733 **Rectifying postures reconstructed from joint angles to meet constraints**

M. Hajjar, W. Même and C. Léoty 737 **Measurement of sarcomere length during fast contraction of muscle fibers by digital image analysis**

M. Zidi and S. Ramtani 743 **Bone remodeling theory applied to the study of *n* unit-elements model**

749 **Book Review**

751 **Erratum: Letter to the Editor by E. Trinkaus**

J. A. Miller and M. M. Gross 753 **Author's response**

I **Announcement**

Volume 32 Number 8 **August 1999**

C. C. van Donkelaar, P. J. B. Willems, A. M. M. Muijtjens and M. R. Drost 755 **Skeletal muscle transverse strain during isometric contraction at different lengths**

B. Fink, G. Schwinger, J. Singer, G. Schmielau and W. Rüther 763 **Biomechanical properties of tendons during lower-leg lengthening in dogs using the Ilizarov method**

G. Bergmann, F. Graichen and A. Rohlmann 769 **Hip joint forces in sheep**

Y.-C. Pai and K. Iqbal 779 **Simulated movement termination for balance recovery: can movement strategies be sought to maintain stability in the presence of slipping or forced sliding?**

D. P. Ferris, K. Liang and C. T. Farley 787 **Runners adjust leg stiffness for their first step on a new running surface**

M. C. Do, C. Schneider and R. K. Y. Chong 795 **Factors influencing the quick onset of stepping following postural perturbation**

R. Taïar, P. Sagnes, C. Henry, A. B. Dufour and A. H. Rouard 803 **Hydrodynamics optimization in butterfly swimming: position, drag coefficient and performance**

A. Arampatzis and G.-P. Brüggemann 811 **Mechanical energetic processes during the giant swing exercise before dismounts and flight elements on the high bar and the uneven parallel bars**

D. Ulrich, B. van Rietbergen, A. Laib and P. Rüegsegger 821 **Load transfer analysis of the distal radius from in-vivo high-resolution CT-imaging**

S. Hansson and M. Norton 829 **The relation between surface roughness and interfacial shear strength for bone-anchored implants. A mathematical model**

J. Z. Wu and W. Herzog 837 **Modelling concentric contraction of muscle using an improved cross-bridge model**

B. M. Nigg and W. Liu 849 **The effect of muscle stiffness and damping on simulated impact force peaks during running**

Technical Notes

H. Windhagen, H. Bail, A. Schmeling, S. Kolbeck, A. Weiler and M. Raschke 857 **A new device to quantify regenerate torsional stiffness in distraction osteogenesis**

K. J. Faran, N. Ichioka, M. A. Trzeciak, S. Han, J. Medige and O. J. Moy 861 **Effect of bone quality on the forces generated by compression screws**

K. B. Arbogast and S. S. Margulies 865 **A fiber-reinforced composite model of the viscoelastic behavior of the brainstem in shear**

S. M. Hsiang, C.-C. Chang and R. W. McGorry 871 **Development of a set of equations describing joint trajectories during para-sagittal lifting**

Volume 32 Number 9 **September 1999**

M. L. van der Linden, S. E. Solomonidis, W. D. Spence, N. Li and J. P. Paul 877 **A methodology for studying the effects of various types of prosthetic feet on the biomechanics of trans-femoral amputee gait**

A. Gefen, D. Elad and R. J. Shiner 891 **Analysis of stress distribution in the alveolar septa of normal and simulated emphysematic lungs**

W. Smak, R. R. Neptune and M. L. Hull 899 **The influence of pedaling rate on bilateral asymmetry in cycling**

T. S. Atkinson, B. J. Ewers and R. C. Haut 907 **The tensile and stress relaxation responses of human patellar tendon varies with specimen cross-sectional area**

S. Sivanesan, T. V. How, R. A. Black and A. Bakran 915 **Flow patterns in the radiocephalic arteriovenous fistula: an in vitro study**

G. A. Hoek van Dijke, C. J. Snijders, R. Stoeckart and H. J. Stam 927 **A biomechanical model on muscle forces in the transfer of spinal load to the pelvis and legs**

M. -G. Ascenzi 935 **A first estimation of prestress in so-called circularly fibered osteonic lamellae**

H. Bao and P. Y. Willems 943 **On the kinematic modelling and the parameter estimation of the human shoulder**

M. L. Harris, P. Morberg, W. J. M. Bruce and W. R. Walsh 951 **An improved method for measuring tibiofemoral contact areas in total knee arthroplasty: a comparison of K-scan sensor and Fuji film**

G. R. Zendehbudi and M. S. Moayeri 959 **Comparison of physiological and simple pulsatile flows through stenosed arteries**

S. M. Kurtz, J. A. Ochoa, C. B. Hovey and C. V. White 967 **Simulation of initial frontside and backside wear rates in a modular acetabular component with multiple screw holes**

Technical notes

P. C. Lugné, J. Alizon, F. Collange and E. Van Praagh 977 **Motion analysis of an articulated locomotion model by video and telemetric data**

M. R. Yeadon and M. A. King 983 **A method for synchronising digitised video data**

M. Hlaváček 987 **A note on an asymptotic solution for the contact of two biphasic cartilage layers in a loaded synovial joint at rest**

M. B. Sabick, J. G. Hay, V. K. Goel and S. A. Banks 993 **Active responses decrease impact forces at the hip and shoulder in falls to the side**

J. Heys and V. H. Barocas 999 **Mechanical characterization of the bovine iris**

Volume 32 Number 10 **October 1999**

P. K. Zysset, X. E. Guo, C. E. Hoffler, K. E. Moore and S. A. Goldstein 1005 **Elastic modulus and hardness of cortical and trabecular bone lamellae measured by nanoindentation in the human femur**

D. D. Cody, G. J. Gross, F. J. Hou, H. J. Spencer, S. A. Goldstein and D. P. Fyhrie 1013 **Femoral strength is better predicted by finite element models than QCT and DXA**

R. R. Neptune and W. Herzog 1021 **The association between negative muscle work and pedaling rate**

S. M. Klisch and J. C. Lotz 1027 **Application of a fiber-reinforced continuum theory to multiple deformations of the annulus fibrosus**

P. S. Donzelli, R. L. Spilker, G. A. Ateshian and V. C. Mow 1037 **Contact analysis of biphasic transversely isotropic cartilage layers and correlations with tissue failure**

S. P. Ahir, G. W. Blunn, H. Haider and P. S. Walker 1049 **Evaluation of a testing method for the fatigue performance of total knee tibial trays**

M. Hlaváček 1059 **Lubrication of the human ankle joint in walking with the synovial fluid filtrated by the cartilage with the surface zone worn out: steady pure sliding motion**

S. Pietruszczak, D. Inglis and G. N. Pande 1071 **A fabric-dependent fracture criterion for bone**

V. Deplano and M. Siouffi 1081 **Experimental and numerical study of pulsatile flows through stenosis: Wall shear stress analysis**

C. Anglin, P. Tolhurst, U. P. Wyss and D. R. Pichora 1091 **Glenoid cancellous bone strength and modulus**

E. T. Hsiao and S. N. Robinovitch 1099 **Biomechanical influences on balance recovery by stepping**

M. Grigioni, C. Daniele, G. D'Avenio and V. Barbaro 1107 **A discussion on the threshold limit for hemolysis related to Reynolds shear stress**

Technical Notes

F. Graichen, G. Bergmann and A. Rohlmann 1113 **Hip endoprosthesis for in vivo measurement of joint force and temperature**

C. Peham, M. Scheidl and T. Licka 1119 **Limb locomotion — speed distribution analysis as a new method for stance phase detection**

P. M. Bursać, T. W. Obitz, S. R. Eisenberg and D. Stamenović 1125 **Confined and unconfined stress relaxation of cartilage: appropriateness of a transversely isotropic analysis**

T. Moro-oka, H. Miura, H. Higaki, S. Arimura, T. Mawatari, T. Murakami and Y. Iwamoto 1131 **A new friction tester of the flexor tendon**

Letter to the Editor

F. T. Sheehan and P. Mitiguy 1135 **In regards to the "ISB recommendations for standardization in the reporting of kinematic data"**

Volume 32 Number 11 **November 1999**

1998 *NACOB Presentation Papers*

S. M. McGill 1137 **Editorial**

D. P. Fyhrie and J. H. Kimura 1139 **Cancellous bone biomechanics**

S. Rietdyk, A. E. Patla, D. A. Winter, M. G. Ishac and C. E. Little 1149 **Balance recovery from medio-lateral perturbations of the upper body during standing**

C. R. Jacobs, B. R. Davis, C. J. Rieger, J. J. Francis, M. Saad and D. P. Fyhrie 1159 **The impact of boundary conditions and mesh size on the accuracy of cancellous bone tissue modulus determination using large-scale finite-element modeling**

General Papers

S. Q. Liu, M. M. Moore, M. R. Glucksberg, L. F. Mockros, J. B. Grotberg and A. P. Mok — 1165 **Partial prevention of monocyte and granulocyte activation in experimental vein grafts by using a biomechanical engineering approach**

W. Y. Gu, X. G. Mao, B. A. Rawlins, J. C. Iatridis, R. J. Foster, D. N. Sun, M. Weidenbaum and V. C. Mow — 1177 **Streaming potential of human lumbar anulus fibrosus is anisotropic and affected by disc degeneration**

I. R. Spears, M. M. Morlock, M. Pfleiderer, E. Schneider and E. Hille — 1183 **The influence of friction and interference on the seating of a hemispherical press-fit cup: a finite element investigation**

M. D. Klein Breteler, C. W. Spoor and F. C. T. Van der Helm — 1191 **Measuring muscle and joint geometry parameters of a shoulder for modeling purposes**

D. Taylor, F. O'Brien, A. Prina-Mello, C. Ryan, P. O'Reilly and T. C. Lee — 1199 **Compression data on bovine bone confirms that a "stressed volume" principle explains the variability of fatigue strength results**

E. Papa and A. Cappozzo — 1205 **A telescopic inverted-pendulum model of the musculo-skeletal system and its use for the analysis of the sit-to-stand motor task**

M. Makhsous, C. Högfors, A. Siemien'ski and B. Peterson — 1213 **Total shoulder and relative muscle strength in the scapular plane**

Technical notes

K. Halvorsen, M. Lesser and A. Lundberg — 1221 **A new method for estimating the axis of rotation and the center of rotation**

M. Ipavec, R. A. Brand, D. R. Pedersen, B. Mavčič, V. Kralj-Iglič and A. Iglič — 1229 **Mathematical modelling of stress in the hip during gait**

H.-B. Schmiedmayer and J. Kastner — 1237 **Parameters influencing the accuracy of the point of force application determined with piezoelectric force plates**

S. S. Huja, M. S. Hasan, R. Pidaparti, C. H. Turner, L. P. Garetto and D. B. Burr — 1243 **Development of a fluorescent light technique for evaluating microdamage in bone subjected to fatigue loading**

Brief communication

K. A. Mann, F. W. Werner and D. C. Ayers — 1251 **Mechanical strength of the cement–bone interface is greater in shear than in tension**

1255 **Letter to the Editor**

1257 **Authors' response**

Volume 32 Number 12 **December 1999**

A. Seyfarth, A. Friedrichs, V. Wank and R. Blickhan — 1259 **Dynamics of the long jump**

N. J. Mansfield and R. Lundström — 1269 **The apparent mass of the human body exposed to non-orthogonal horizontal vibration**

M. Ouamer, M. Boiteux, M. Petitjean, L. Travens and A. Salès — 1279 **Acoustic myography during voluntary isometric contraction reveals non-propagative lateral vibration**

C. Herberhold, S. Faber, T. Stammberger, M. Steinlechner, R. Putz, K. H. Englmeier, M. Reiser and F. Eckstein — 1287 **In situ measurement of articular cartilage deformation in intact femoropatellar joints under static loading**

M. A. Swartz, A. Kaipainen, P. A. Netti, C. Brekken, Y. Boucher, A. J. Grodzinsky and R.K. Jain — 1297 **Mechanics of interstitial-lymphatic fluid transport: theoretical foundation and experimental validation**

P. B. Chang, B.H. Robie and D. L. Bartel — 1309 **Preclinical cost analysis of orthopaedic implants: a custom versus standard cementless femoral component for revision total hip arthroplasty**

C. J. Egelhoff, R. S. Budwig, D. F. Elger, T. A. Khraishi and K. H. Johansen — 1319 **Model studies of the flow in abdominal aortic aneurysms during resting and exercise conditions**

Technical notes

H. J. Pfaeffle, K. J. Fischer, T. T. Manson, M. M. Tomaino, J. H. Herndon and S. L-Y. Woo — 1331 **A new methodology to measure load transfer through the forearm using multiple universal force sensors**

G. S. Rash, P. P. Belliappa, M. P. Wachowiak, N. N. Somia and A. Gupta — 1337 **A demonstration of the validity of a 3-D video motion analysis method for measuring finger flexion and extension**

A. Iglič, V. Kralj-Iglič and J. Majhenc — 1343 **Cylindrical shapes of closed lipid bilayer structures correspond to an extreme area difference between the two monolayers of the bilayer**

A. Arampatzis, G.-P. Brüggemann and V. Metzler — 1349 **The effect of speed on leg stiffness and joint kinetics in human running**

M. J. Faber, H. C. Schamhardt and P. R. van Weeren — 1355 **Determination of 3D spinal kinematics without defining a local vertebral coordinate system**

A. Arndt, P. Westblad, I. Ekenman, K. Halvorsen and A. Lundberg — 1359 **An in vitro comparison of bone deformation measured with surface and staple mounted strain gauges**

J. Catanese III, E. P. Iverson, R. K. Ng and T. M. Keaveny — 1365 **Heterogeneity of the mechanical properties of demineralized bone**

G. S. Fleisig, S. W. Barrentine, N. Zheng, R. F. Escamilla and J. R. Andrews — 1371 **Kinematic and kinetic comparison of baseball pitching among various levels of development**

Y. -C. Pai — 1377 **Induced limb collapse in a sudden slip during termination of sit-to-stand**

1383 **Announcement**
